

Birch Plywood

BBS Timbers Birch Ply is one of the best interior plywood panels on the world market. The high quality, grain and stability characteristics of Birch Plywood create an aesthetic appearance to any project.

Birch Plywood is easy to handle and adds to a wide range of applications in the joinery and furniture industry. The face veneer is generally of a high quality and suitable for painting, staining or lacquering.

The B face grade allows for minor repairs, visible are occasional minor filled splits. The BB grade back allows for slightly larger inter-grown knots and repairs. BBS Timbers Birch Plywood is a great substrate for overlaying with either a HPL or natural wood veneer giving a feature to the multi-ply edge detail.

Description

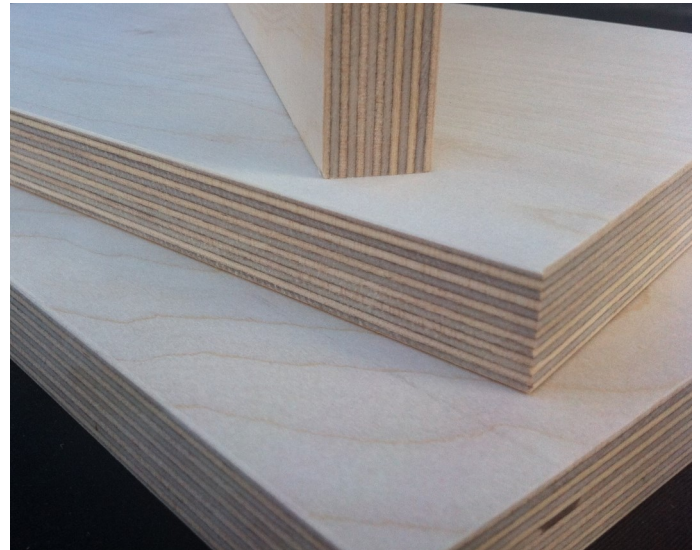

- Creamy white, fine texture & lustrous finish
- This plywood is made from 100% Russian Birch
- E1 Formaldehyde
- B/BB Face , WBP Exterior Grade
- Weight 652 kg/m³

Properties

- Exceptional durability & wear resistance
- High surface hardness
